

# Alexander Golubski

## Software Engineer in Kansas City, KS

I am actively seeking a development role that will utilize my experience with IT, second-language acquisition, and pedagogy to design software solutions to problems of communication and connection with the ultimate goal of increasing human flourishing.

## PROJECT EXPERIENCE

### Flashcard Tracker — Spaced Repetition Flashcard App

- Planned app will allow teachers to create decks of digital flashcards and assign them to classes of students who can review the cards in the app based on a spaced repetition algorithm
- Teachers will be able to track student progress
- Uses Python, Flask, SQLAlchemy and MySQL
- <https://github.com/Alexander-Golubski/flashcard-tracker>

## WORK EXPERIENCE

### Mandarin to English Translator — Freelance, Kansas City, KS

May 2012 - April 2015, February 2018 - Present

- Responsible for remote Mandarin to English translation of business documents and manuals, with an emphasis on legible, professional English composition
- Managed simultaneous English/Mandarin conference calls
- Produced translations of business correspondence while meeting client standards and deadlines

### Resource Analyst — University of Kansas Hospital, Kansas City, KS

April 2015 - February 2018

- Assisted initial implementation of new hospital-wide staffing software program (SmartSquare), including go-live and pre/post training, alongside continued support to end-users
- Developed proactive plans to meet future and immediate hospital unit staffing needs in a fast-paced environment
- Drafted and shared analytical reports with stakeholders concerning projected staffing shortages, up to a year in advance
